

Job Title: Senior ICT Development Consultant

Position Overview and core responsibilities

We are seeking a full-time Senior ICT Development Consultant to work at Intelcon's head office in Vancouver, with some international travel. You will be part of a multidisciplinary team but are expected to work independently. The consulting projects on which you will be working are related to Universal Access policy, backbone and broadband development, rural communications development, and ICT strategies. Core tasks and responsibilities are as follows:

- Managing rural field research and demand studies;
- Conducting thorough policy and regulatory analysis;
- Interviewing operators, service providers, government, NGO and rural stakeholders;
- Policy and strategy drafting;
- Proposal and report writing;
- Traveling to developing countries; and
- Working directly with clients in development banks, regulators and government departments.

Responsibilities are subject to change, and tasks may be added as appropriate.

Job requirements

You will likely have a Masters Degree in Economics, Political Science or a related field. We are looking for candidates with at least five years consulting experience in telecommunications development and policy in developing countries. This ideally includes project co-ordination and management, and Universal Access. A technical or statistics background would be an asset.

Strong communication and interpersonal skills, both in writing and oral presentation, are essential. We require a competent candidate who takes pride in his or her quality of work, who can handle deadlines and multi-tasking, is able to organise his or her work independently, and is capable of making a contribution to the team. Proficiency in French or Spanish would be an asset.

Intelcon

Established in 1985, Intelcon is an international telecommunications consulting firm, specialising in developing countries and emerging markets. We are a small but dynamic and growing company. We advise governments, development banks, operators and investors, typically related to policy, market and business issues. Universal Access and rural telecommunications are key areas of our expertise. We are committed to providing sound analysis and practical solutions which make a difference to our clients. We take pride in the quality of our work and exceptional client relations. We offer thought-provoking and leading edge communications development work, hands-on in-country involvement, backed by a friendly team atmosphere, central location and an attractive salary and benefits package.

Please apply to Joanna Hindle (jhindle@inteleconresearch.com) with cover letter (highlighting your relevant experience, interests and salary expectations) and CV. Only those applicants selected for an interview will be contacted.
